

# QuickLearning:- Deployment Manual

## Prerequisites for Deployment

- XAMPP should be installed on the system.  
XAMPP Download Link:- <https://www.apachefriends.org/download.html>

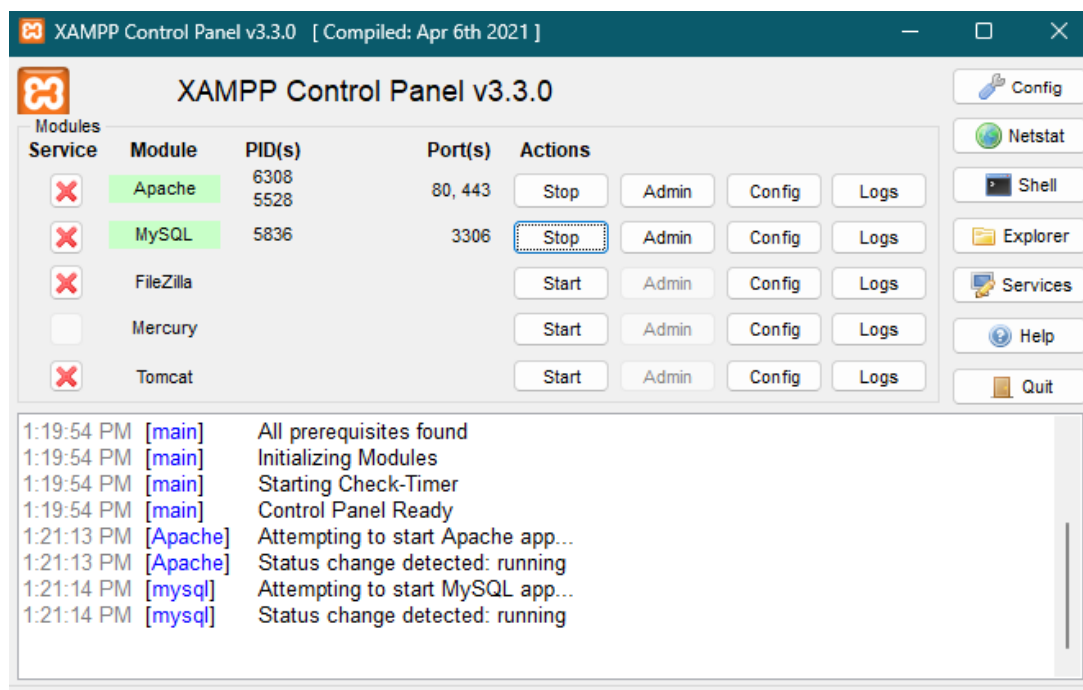

## Extracting the application:

- Extract the QuickLearning.zip in XAMPP's "htdocs" directory.  
For example:- The QuickLearning.zip is extracted in directory "C:\xampp\htdocs"

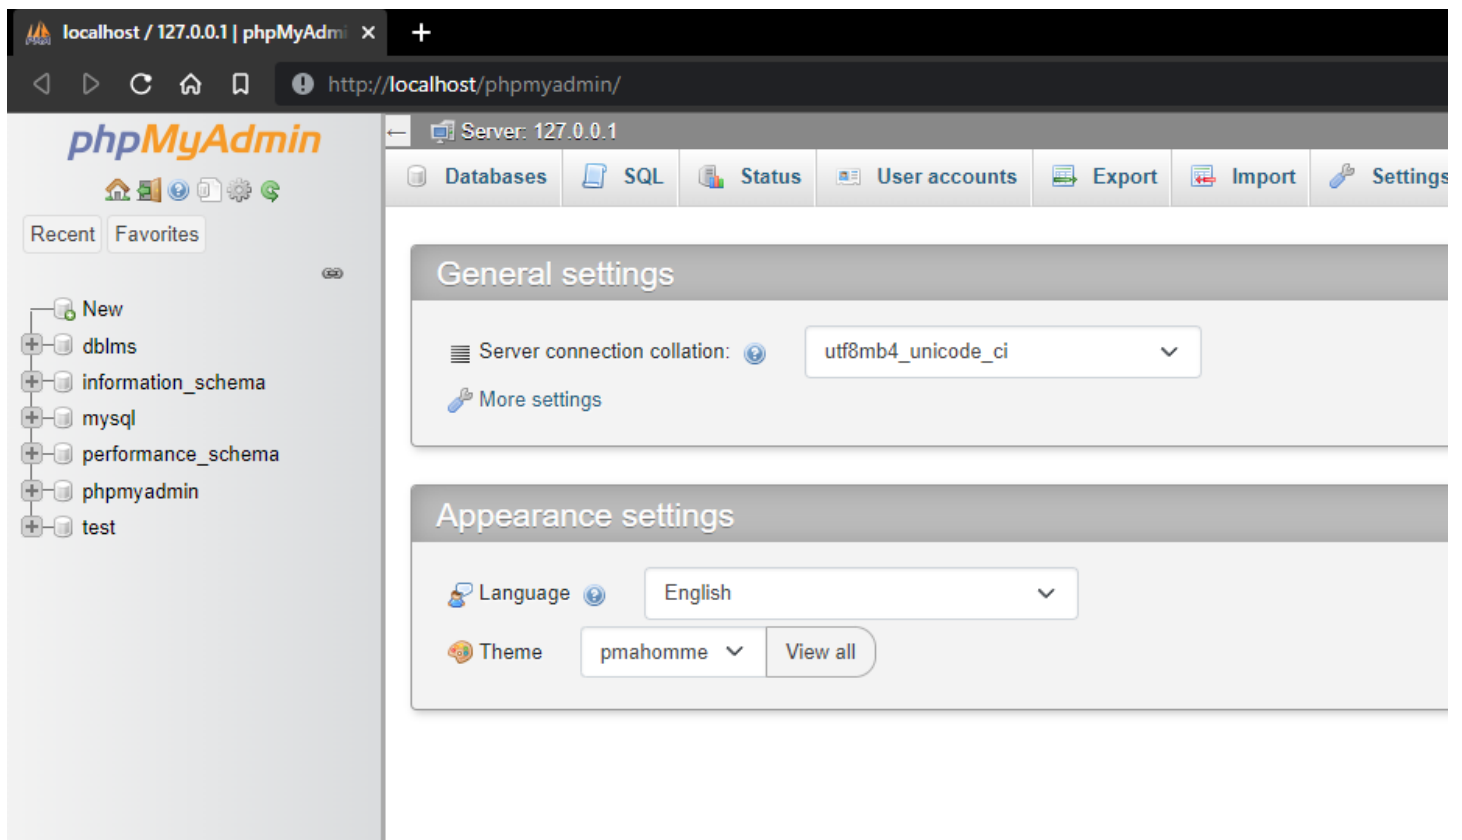

## Running XAMPP:

- After installing XAMPP, click on the "XAMPP Control Panel" and start 2 services "Apache" & "MySQL"

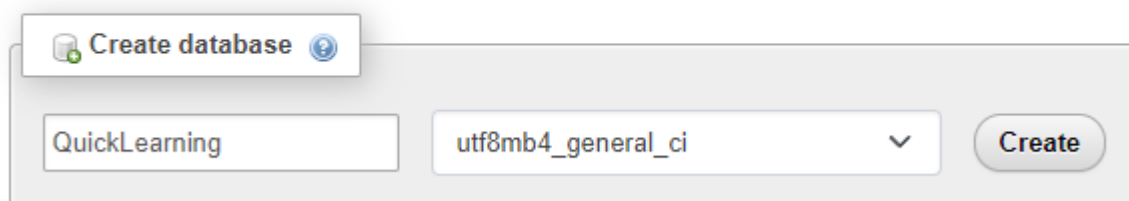

## Loading Database:

- After starting “MySQL” service click on “Admin”, XAMPP will redirect you to page in your browser, URL:- <http://localhost/phpmyadmin/>

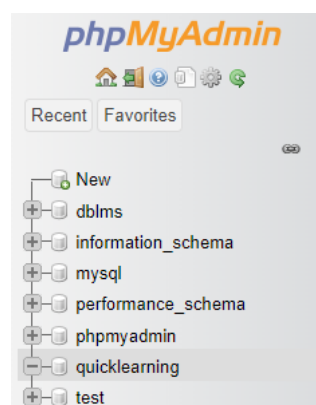

- On phpMyAdmin, click on database and create a database with any name and then click on create.

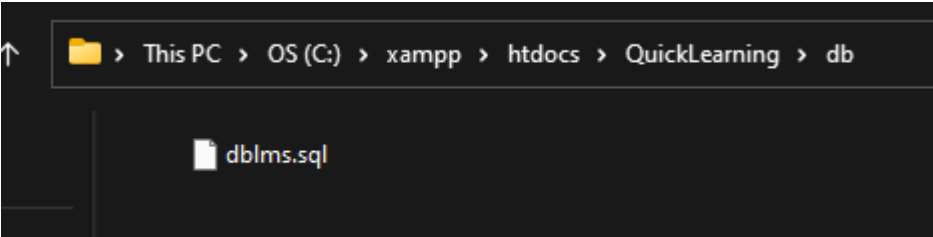

## Databases

- After creating database, click on the name of the database you have created.

- Then click on import and choose the default database provided in a sub folder named “db” in “QuickLearning” folder and scroll down in phpMyAdmin and click on “Import”.

Database: quicklearning

Search Query Export Import Operations Privileges Routines Events Triggers Tracking Designer Central columns

Importing into the database "quicklearning"

**File to import:**

File may be compressed (gzip, bzip2) or uncompressed.  
A compressed file's name must end in .[format].[compression]. Example: .sql.zip

Browse your computer: (Max: 40MiB)

Choose File

You may also drag and drop a file on any page.

Character set of the file:

**Format**

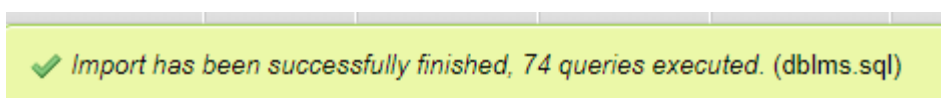

**Format-specific options:**

SQL compatibility mode:

☒ Do not use AUTO\_INCREMENT for zero values

**Import**

- After successfully importing the database, you will get this message.

### Running the Application:

- Open any browser and type in the URL:- <http://localhost/QuickLearning/>  
Admin Login ID:- **brewing.technologies@gmail.com**  
Admin Login Password:- **admin**
